

Aryel Evelin Vieira Garcia

Business Analyst | Process Analyst | Product Owner

Morrinhos, GO | (64) 99305-5216 | yel.evelin@gmail.com | [Linkedin](#)

PROFESSIONAL SUMMARY

Business Analyst and Product Owner with a solid track record at Thomson Reuters Brazil, specialized in process mapping and modeling (BPMN), requirements gathering and translation, and backlog management in agile environments (Scrum/Kanban). Direct experience acting as a bridge between business, technology, and support areas, leading API integrations, adaptation to regulatory changes, and process digitalization for operational efficiency. Complemented by applied experience in Artificial Intelligence, expanding the ability to propose technological solutions aligned with business strategy.

PROFESSIONAL EXPERIENCE

Mid-level Business Analyst (Product Owner) | Thomson Reuters Brazil

November 2021 - March 2026

- Managed agile product adaptation facing critical market regulatory changes, mapping new scenarios via BPMN and leading technical validation, ensuring compliance and unblocking the development pipeline.
- Led the expansion of high-complexity integrations and APIs, optimizing the customer journey by implementing single-click automated flows and drastically reducing the execution time of manual billing tasks.
- Acted as a bridge between technical and support areas in the integration cycle, modeling process flows (BPMN) to ensure development accuracy and creating accessible documentation for the Support team.
- Led the evolution and integration of high-data-volume SaaS platforms, focusing on scalability, operational efficiency, and the digitalization of bureaucratic processes.
- Backlog management, demand prioritization, and functional requirements definition within agile methodologies (Scrum and Kanban).

IT and Marketing Analyst | ACSSoftware - Manage Engine

July 2018 - November 2021

- Leadership in agile process implementation, project management, and continuous compliance with LGPD.
- Requirements analysis, consulting, and implementation of corporate software (ERP, CRM) for clients.
- Technical support and management of technical teams in system implementation projects.

AI Training Specialist & Prompt Engineer | Freelancer (Alignerr | Mindrift | Outlier)

November 2023 - Present

- Translation of complex business rules into logical training parameters for AI models, applying the same requirements gathering and structuring discipline used in product environments.
- Evaluation and refinement of flows and processes in generative AI systems, reinforcing a systemic perspective on the integration between business rules and technical execution.

SKILLS AND COMPETENCIES

- **Product and Business:** Product Management, Backlog Management, Demand Prioritization, Agile Methodologies (Scrum, Kanban), Systemic Vision, UX/UI Design.
- **Processes:** Process Modeling (BPM/BPMN), Requirements Gathering and Translation, Compliance and Regulatory Adaptation, LGPD.
- **Technology:** System Integration (APIs, Web Services), Solution Architecture, ERP/CRM Implementation, Technical Leadership.
