AI SPECIALIST | PRODUCT ENGINEER | TECHNICAL PRODUCT | BUSINESS ANALYST

PROFESSIONAL SUMMARY

I'm a hands-on, T-Shaped professional operating at the intersection of Product Management, Software Engineering, Artificial Intelligence, and Growth Strategy. With a consolidated track record in high-growth B2B SaaS environments, I specialize in bridging the gap between technical execution and market impact. My technical core includes owning roadmaps, writing problem-first specs, reasoning about REST API contracts, and executing end-to-end QA. This foundation is amplified by my daily fluency in agentic tooling (Claude Code, Cursor, LLMs), Python automations, and prompt engineering, paired with a strong analytical vision for Growth Marketing. I possess a unique capability to structure scalable digital ecosystems from end to end—combining robust system architecture with data-driven content funnels, SEO strategy, and storytelling—driving rapid feature delivery while ensuring high user retention and conversion.

CORE COMPETENCIES

- **Product Management:** Roadmap Ownership, Problem-First Specs, Success Criteria Definition, Agile (Scrum/Kanban), BPMN Process Modeling.
- **Engineering & QA:** Python, JavaScript/TypeScript, SQL, REST APIs / System Integrations, Full-Stack Navigation, End-to-End QA (Test Cases, Regression Cycles, Release Sign-off).
- **AI & Agentic Workflows:** Claude Code, Cursor, Replit, LLM Training (RLHF), Prompt Engineering, Automations, Python Scripts.
- **Growth & Marketing:** Direct-Response Copywriting, Content Funnels, Paid Traffic Management (Google Ads), Storytelling, Data-Driven Strategy, Audience Engagement, Market Trend Analysis via Python & AI.

PROFESSIONAL EXPERIENCE

Thomson Reuters Brazil | Remote
Tech Business Analyst / Product Owner | Nov 2021 – Mar 2026

- **Roadmap & Requirements:** Owned product strategy, backlogs, and complex software requirements for high-volume B2B SaaS platforms (Tax & Accounting), writing problem-first specs, user stories, and technical specifications for engineering pods. **Technical Participation & APIs:** Led high-complexity API integrations and system evolutions, reasoning deeply about REST contracts and navigating technical requirements to ensure scalability and unblock development teams.
- **Cross-Functional Product Leadership & NFS-e Automation:** Led the automation and unification of complex municipal and National Standard NFS-e layouts (XML/JSON), successfully reducing customer churn by 70%. Successfully built and executed REST API and web service integrations independently prior to engineering hand-off. Acted as a T-Shaped strategic bridge across all organizational layers: authored code-ready technical specifications (Dev), structured preventive validation guardrails (QA), drove go-to-market

initiatives (Marketing), and created comprehensive enablement playbooks for Support.

- **Process Modeling & BPMN:** Designed complex regulatory workflows and system integration processes using BPMN, bridging business expectations with technical execution while eliminating low-leverage work.
- **Agile Governance & Delivery:** Managed demand prioritization and sprint ceremonies (Scrum/Kanban), driving agile adaptations to critical market shifts to ensure continuous feature delivery and rapid bug resolution.
- **End-to-End QA Ownership:** Defined testable acceptance criteria, regression cycles, and validation sign-offs, establishing strict quality guardrails to guarantee zero-ambiguity deployments.

Freelance (Alignerr / Mindrift / Outlier) | Remote
AI Training Specialist & Prompt Engineer | Nov 2023 – Aug 2026

- **Agentic Tooling & Code:** Utilize AI-native development tools, LLMs, and Python daily to write, debug, and optimize scripts.
- **Technical Depth:** Navigate complex ML frameworks, executing Python code to define logic parameters, reward functions, and automation flows.
- **Problem Solving:** Translate complex business logic into structured parameters for AI models, demonstrating the ability to ship functional solutions and tweaks independently when it is the fastest path forward.

ACSoftware - Manage Engine | Remote
IT Analyst & Marketing Analyst | Jul 2018 – Nov 2021

- **Hands-on Technical Support & IT:** Acted as the technical bridge for corporate software (ERP, CRM) deployments, handling structured bug reports, troubleshooting, and requirements analysis. Implemented ITIL, ITSM, SharePoint, and other systems.
- **Marketing & Digital Strategy:** Led the company's digital initiative front, restructuring communication on social media and consolidating the brand's definitive positioning in the digital space.
- **Content & Storytelling:** Co-created and co-scripted "Podcafé Tech", managing format creation, early episode scripting, and aligning the brand's tone of voice.
- **Editorial Management:** Responsible for writing, technical review, and strategic content management for 5 simultaneous corporate blogs, in addition to maintaining WordPress portals and optimizing product texts.

PROJECTS

- **KM Engine Growth AI:** Python automation and multi-AI orchestration (Gemini, ChatGPT, Claude) for brand tone analysis and high-conversion VSL script generation.
- **MyPet Story:** Python automation and multimodal AI (Gemini API / Google AI Studio) for integrated pet-life management built for pet owners, covering smart alarms, ID OCR (SINPATINHAS), and unified medical records.
- **NFSe Engine:** Python and FastAPI automation integrating the Model Context Protocol (MCP) with LLMs. Built an intelligent engine for the dynamic mapping and translation of multiple chaotic municipal Service Invoice (NFS-e XML) layouts into a unified canonical JSON schema, focused on resilience against mathematical hallucinations in financial data.

EDUCATION & CERTIFICATIONS

- **Degree:** Technologist in Internet Systems – Instituto Federal Goiano – Campus Morrinhos
- **Postgraduate:** Privacy and Protection of Personal Data (LGPD Focus) – Faculdade Descomplica
- Strategy and Operations - International Business Management Institute (IBMI)
- Marketing and Communications - International Business Management Institute (IBMI)
- **Certifications:**

  Prompt Engineering for Software Engineers — USP

  Enterprise Design Thinking — IBM

  Six Sigma Yellow Belt — VMEdu

  Scrum Fundamentals — VMEdu

  UX/UI: Fundamentals for Interface Design — NEU USP

  Practical Application of Generative AI for Project Managers — PMI

  Basic Course of Bug Finding — UNGUESS

  Data Protection and DPO Training — SeuFuturo.com
